Year 11 Enrichment

Are you attending?

Monday	Tuesday	Wednesday	Thursday	Friday
Science		Maths	English	Options

Why is attendance important?

- It is a legal requirement to attend school.
- For every 10% attendance drops, research suggests that GCSE outcomes drop by 1 grade.
- Nationally only 10% of students with poor attendance (below 96%) achieve 5 GCSE grades at 4+, compared to 60% of students with good attendance achieving the same.
- Nationally 21% of students with poor attendance leave school with no qualifications, compared to 3% of those with good attendance that fail to achieve any qualifications.

Punctuality

Arriving to school on time every day and to every lesson makes a difference.

LATENESS = LOST LEARNING

Minutes lost each day	5 minutes	10 minutes	15 minutes	20 minutes	30 minutes
Days per school year lost	3 days	6.5 days	10 days	13 days	19 days

Every minute of
every lesson
counts

How we support students?

- High Quality Teaching and Learning
- I-I Intervention for a variety of subject areas
- After school enrichment
- Specialist Director support
- Subject specific tutor groups
- Praising Stars reports
- Parental consultation evenings
- RAG assessments (weekly)
- Y11 Learning Manager

Confidential - do not duplicate or distribute without the written permission of OGAT

How you can support students

- Ensure your child is in school every day and on time
- Encourage them to attend enrichment
- Engage with parental consultations
- Praising Stars reports - discuss these with your child
- Support with revision
- Communicate with staff
- Future plans - access college events/ careers

Students First Raising Standards and Transforming Lives

The Importance of Sleep

Increasingly, studies show that the pattern and quality of our sleep is not only closely linked with our mental health and wellbeing, but also with our immune system, our alertness/cognitive functioning, our mood, our physical well being, blood pressure and general health.

Teenagers need around 8 to 10 hours of sleep a night.

Confidential - do not duplicate or distribute without the written permission of OGAT

Strategies to support good sleep:

- Have a regular time to go to sleep and wake up.
- Have a predictable and consistent routine.
- Get enough exercise during the day.
- Avoid napping in the day.
- Avoid caffeine, particularly in the afternoon.
- Turn off computer screens or other devices at least an hour before bedtime. Blue light from TVs, tablets and mobiles excite the brain and interfere with the sleep hormone levels, preventing the brain from feeling sleepy.
- Have low lighting and a quiet space in bedrooms.
- Avoid checking devices, particularly in the middle of the night.

Confidential - do not duplicate or distribute without the written permission of OGAT

The Importance of a Healthy Diet - Issues

Skipping breakfast

Breakfast is an important meal of the day as it helps to ensure daily nutrient needs are being met. It also improves school performance. The majority of teens do not eat breakfast on a regular basis.

Sugary drinks and snacks

Foods high in refined sugar and saturated fat have a significant impact on brain function.

It is known excessive consumption of junk foods damage areas of the brain essential for learning and memory processes. Neurons in the brain that encode memories, no longer work efficiently, leading to poorer learning.

Confidential - do not duplicate or distribute without the written permission of OGAT

The Importance of Fresh Air and Exercise.

You can't work well all day every day.

And you shouldn't.

Revision is as much about **quality** as it is quantity. Take breaks, go for a walk, get some fresh air to clear your mind, do a bit of yoga. Exercise is proven to reduce stress and anxiety. It also increases your self esteem.

Students First Raising Standards and Transforming Lives

- **Enrichment** :
Wednesday 2:30 to 3:30 pm
- **Exam Dates : provisional**

Paper 1 - non calculator - Friday 19 May (am)

Paper 2 - calculator - Tuesday 6 June (am)

Paper 3 - calculator - Wednesday 14 June (am)

Confidential - do not duplicate or distribute without the written permission of OGAT

Maths - How to revise

- Regular practise by completing a variety of questions
- Exposure to lots of questions ensures students can see the different ways that skills are tested.

Confidential - do not duplicate or distribute without the written permission of OGAT

Maths - Resources

- Completing online homework on Sparx.
- This is the most effective way to revise while out of school
- To be effective it has to be completed regularly (each week).

Confidential - do not duplicate or distribute without the written permission of OGAT

Your email address will be recorded when you submit this form

*Required

What is your full name? *

Your answer

Scrooge is delighted to find himself... *

1 point

- in a comfortable chair by the fire.
- in his own bed on Christmas Day.
- in the streets celebrating Easter.

At the beginning of this chapter Scrooge says he's "quite a baby". In this instance, this means... *

1 point

- He's always crying.
- He's got a new love for children and the joy they bring.
- It's as if he's been reborn into a new life.
- He's always screaming and shouting.

28. Photosynthesis

Topic 4 —
Bioenergetics

Quick Questions

- 1) True or false? Photosynthesis is an exothermic reaction.
- 2) Which molecule has the chemical symbol $C_6H_{12}O_6$?
- 3) Complete the word equation for photosynthesis:

carbon dioxide + $\xrightarrow{\text{light}}$ +

Now try these:

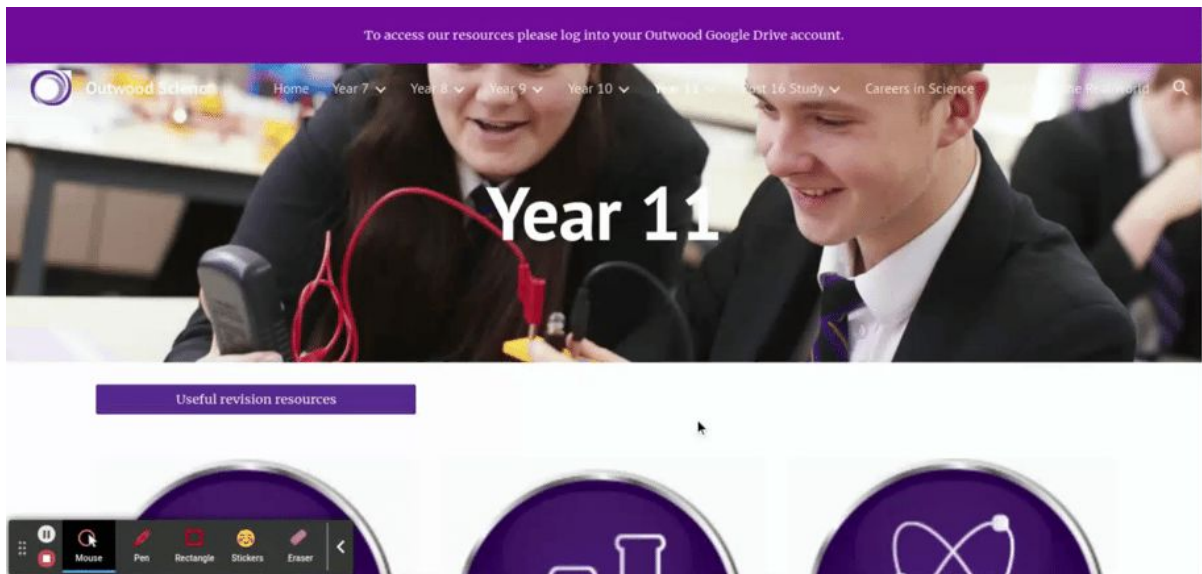

- 4) What is chlorophyll? What role does it play in photosynthesis?
- 5) Explain why plant cells convert glucose to starch for storage.
- 6) Other than for storage, describe two ways that plants use glucose.

Plants really live the good life — they get to sit back, relax and enjoy the sunshine. They don't have it all though, as several factors limit the rate at which they can use the sunlight.

Design & Technology - Exam Terminology for Success

These revision organisers will be given to all students to help with revision at home.

Master Key Terms Knowledge Organiser:

Key terms that every pupil needs to know for the AQA Design Technology GCSE

- 1) Functionality**
How well a product carries out its purpose.
- 2) Fusibility**
How well a material is converted by heat into a molten or liquid state dependent on its melting point.
- 3) Iterative design**
Design methodology based on a cyclical process of analysing, prototyping and testing to refine a product. Each iteration and result starts the process again.
- 4) Lean manufacturing**
Reducing and eliminating waste in a manufacturing process.
- 5) Life cycle assessment**
A technique used to assess the environmental impact of a product at all stages of its manufacture, use and disposal.
- 6) Market pull**
Products developed to meet the needs of society or a specific section of the market.
- 7) Mechanical device**
Mechanism which produces and/or changes movement.
- 8) Nesting**
The tessellation of shapes or nets on a material to minimise the amount of waste during manufacture.
- 9) Client**
The person/people/audience being designed for and whose needs are being met.
- 10) Commercial process**
Manufacturing method used to produce products in quantity.
- 11) Commercial product**
A product intended to make money.
- 12) Conceptual stages (of design)**
Use of models, sketches and computer aided design (CAD) to show the design of a product as it develops.
- 13) Continuous improvement**
The identification of improvements and subsequent evolution of products.
- 14) Co-operative**
A group of people united to meet common social, economic or cultural need through a jointly-owned business.
- 15) Crowd funding**
A large number of people who raise money for a project or venture.
- 16) Ecological**
The consideration of the environment and the impact that design can have on it.

Finite
A material or source which will one day run out. Oil is extracted from the ground and is used to make plastics but will one day run out. As such, it is not sustainable.

Automation
The use of control systems for operating equipment such as machinery and processes in factories; this reduces human input.

- 17) Physical properties**
Properties that refer to the actual matter that forms the material (eg insulation, conductivity, fusibility).
- 18) Primary source**
Research collected first-hand by a designer to develop a product or idea.
- 19) Primary source (of materials)**
Where materials originate (polymers from oil etc) and the raw material that needs to be converted into a workable form.
- 20) Product**
Item or artefact developed for an intended audience to solve a problem or meet a need.
- 21) Schematic diagram**
Graphic symbols or simplistic diagrams used to convey a system (eg an underground map).
- 22) Social footprint**
The impact a product or individual has on society.
- 23) Social responsibility**
The idea that a designer needs to evaluate the impact their product could have on society and take action to make this better.
- 24) Stock form**
The standard shape and size of materials as they are bought.
- 25) Technology push**
Technological discoveries used to drive the development of a product.
- 26) Tolerance**
The minimum and maximum measurements that can be accepted when manufacturing.
- 27) User**
The person/people who make use of the product that has been developed by a designer.
- 28) User centered design**
Design development with the user at the centre of the focus. The designer tries to envisage how the product will actually be used, as opposed to focusing on other areas such as cost.
- 29) Working properties**
How a material reacts to external forces.
- 30) Ethics**
Moral decisions when designing and manufacturing.
- 31) Fabricate**
Using processes such as cutting, bending, joining and assembly to produce products.

Prototype
An early model or sample of a product used to test a concept.

Planned obsolescence
A designer deliberately designs the lifecycle of a product to be short, forcing the user to update their products quickly.

Did you know?
Planned obsolescence is where...

Hospitality & Catering - Exam Success
